Dear Resident,

The purpose of this letter is to ask for your cooperation in ensuring safe drinking water for the Freedom Hill Cooperative water system.

If we are all careful, substances that could pollute our drinking water will never find their way to our wells. Your property is located within the area from which water flows to our wells. As such, it is important that you are aware that what you do on your property could affect the quality of the water our system uses. Your activities can also affect the water quality at your own property.

No one wants to drink polluted water. Who would pour gasoline, motor oil, paint, garden or lawn chemicals, or household chemicals into their drinking water? Yet, the equivalent is done when someone pours any of these products down their toilet, sink, or onto the ground. The following flyers contain guidelines to help you avoid the activities that could threaten water quality:

[Got Clean Drinking Water? It's Up to You!](#)
[Best Management Practices for Groundwater Protection](#)

These flyers are available on our Water System page of our website (FHCoop.org) and some will be made available in the mailhouse, and the meeting room of the Bartlett Shed. Please take the time to review and follow the instructions on the flyers. We need your help to protect this valuable source of drinking water.

The management and users of this public water supply appreciate your cooperation.

Sincerely,
FREEDOM HILL COOPERATIVE, INC

Donna Rollins
President
